

Shreyash Meshram

Full-Stack & Applied-AI Engineer

shreyashmeshram0031@gmail.com

github.com/shreyuu · linkedin.com/in/shreyuu · Nottingham, UK

PROFILE

Full-stack developer pursuing an MSc in Business Analytics at the University of Nottingham. I build systems that are fast, correct, and a pleasure to use — from FastAPI services to React frontends to ML pipelines that ship. Open to part-time and graduate roles.

EXPERIENCE

Python Developer Intern

Aug 2024 – Feb 2025

■ Arohi Softwares

Built responsive Django UIs, integrated REST APIs, and owned schema design across a cross-functional Agile team.

- Reduced API response times ~40% via query batching + indexed lookups
- Shipped 6 feature releases on a weekly cadence with zero rollbacks

Software Developer Intern

Mar 2024 – Apr 2024

■ NerdTech

Shipped client software with a user-centric focus; cut runtime errors through systematic debugging and test coverage.

- Cut runtime errors 30% by introducing an end-to-end test harness
- Closed 22 backlog bugs in 6 weeks

ML with AI (Python) Trainee

Dec 2021 – Feb 2022

■ Knowledge Solutions India

Deployed an ML pipeline for a Heart Disease Predictor using scikit-learn and Pandas.

- Reduced partner inventory costs 15% via a demand-forecasting model
- Achieved 89% recall on the heart-disease classifier across 5-fold CV

EDUCATION

University of Nottingham

Sep 2025 – Sep 2026

MSc, Business Analytics – Nottingham, UK

Sandip Institute of Technology & Research Centre

2022 – 2025

BE, Computer Engineering – Nashik, India

TOOLKIT

Languages & Tools	Python, JavaScript, TypeScript, Java, C, C++, Git, Docker
Backend & Frameworks	FastAPI, Django, Flask, React, TailwindCSS, REST APIs
Data Science & ML	TensorFlow, scikit-learn, Pandas, MediaPipe, NumPy
Cloud & Databases	AWS, GCP, Azure, Firebase, PostgreSQL, MongoDB, MySQL

SELECTED PROJECTS

- ZenSpend** — Privacy-first AI expense tracker — FastAPI, LangChain, pgvector, local Llama via Ollama.
- FENgine** — Chess-board OCR to FEN/PGN — OpenCV perspective transform + CNN classifier (~97% val acc).
- FinCast AI** — Market analysis — technical indicators, SVM predictor, FinBERT news sentiment in a TS/React dashboard.
- BFSI Sentiment Analysis** — NLP headline classifier — TF-IDF + gradient-boosted ensembles + BERT (~95% acc).
- Retail Customer Segmentation** — K-Means over loyalty-card data into five interpretable segments; PCA + silhouette validation.
- FoodCorp Store KPI Analysis** — SQL views, Databricks & Tableau over £1.29M of transactions across four UK stores.
